

BELLAM HEMANTH KUMAR REDDY

DevOps Engineer | SRE | DevSecOps | AIOps | Kubernetes | AWS | Terraform | CI/CD

Tirupati, India | +91-7674833609 | hemanthkumarb651@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

DevOps / SRE Engineer with hands-on experience in Site Reliability Engineering, DevSecOps, AIOps, and cloud infrastructure. Managed 6+ enterprise Kubernetes and WebLogic environments. Reduced patching time by 75%, accelerated deployments by 50%+, and improved MTTR by 30-50% through IaC, CI/CD automation, and observability. Built AI-integrated automation platforms using LLM agents and the Model Context Protocol (MCP). Certified in AWS, Azure, Terraform, RHCSA, and Claude Code Architect.

TECHNICAL SKILLS

Cloud: AWS (EC2, EKS, S3, VPC, IAM, Route53), Azure | **Containers:** Docker, Kubernetes, EKS, Kustomize | **IaC:** Terraform, Ansible | **CI/CD:** Jenkins, GitHub Actions, ArgoCD, GitOps | **Monitoring:** Prometheus, Grafana, Centralized Logging | **Security:** DevSecOps, Container Hardening, Secrets Management, RBAC | **Scripting:** Python, Bash, Shell | **OS:** RHEL, Linux | **AI/MLOps:** LLM Agents, Model Context Protocol (MCP), GitHub Copilot, AIOps, Prompt Engineering | **Other:** WebLogic, REST APIs, Jira, Agile, SRE

PROFESSIONAL EXPERIENCE

DevOps Engineer — Accenture | February 2024 – Present

- Managed 6+ Kubernetes and WebLogic environments ensuring 99.9% availability across dev, test, and staging.
- Automated infrastructure provisioning and patching with Ansible and Terraform (IaC), reducing patching time by 75%.
- Built and optimized CI/CD pipelines (Jenkins, GitHub Actions), accelerating deployments by 50%+.
- Implemented centralized monitoring (Prometheus, Grafana), reducing Mean Time to Resolution (MTTR) by 30-50%.
- Deployed GitOps workflows with ArgoCD for zero-downtime, version-controlled Kubernetes releases.
- Integrated DevSecOps practices — security scanning, policy-as-code, and RBAC enforcement in CI/CD pipelines.
- Authored RCA reports, runbooks, and SRE documentation, improving incident response and team onboarding.
- Leveraged AI tools (GitHub Copilot, LLM agents) to accelerate IaC development, code reviews, and incident triage.

KEY PROJECTS

End-to-End DevOps Cloud Architecture on AWS

- Provisioned production AWS infrastructure (VPC, EKS, EC2, S3, IAM, Route53) using Terraform.
- Containerized workloads with Docker/Kubernetes (EKS); implemented GitOps (ArgoCD) for zero-downtime deployments.
- Configured Route53 DNS, Ingress Controllers, and Prometheus/Grafana observability stack.

Jira MCP Server on Kubernetes (AI-Powered Automation Platform)

- Architected and deployed a production-grade AI integration platform using the Model Context Protocol (MCP), enabling LLM agents (GitHub Copilot) to perform Jira operations via natural language across 22 automated tools.
- Implemented multi-user PAT authentication, hardened Docker image (non-root, read-only FS, dropped capabilities), and Kubernetes manifests with Kustomize, health probes, and resource limits.
- Designed resilient API layer with exponential backoff retries; authored prompt engineering templates (.agent.md) and onboarding runbooks for team-wide AI adoption.

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA)** — Linux System Administration
- AWS Certified Cloud Practitioner** — AWS Cloud Fundamentals and Architecture
- Microsoft Certified: Azure Fundamentals (AZ-900)** — Azure Cloud Services and Concepts
- HashiCorp Certified: Terraform Associate** — Infrastructure as Code and Cloud Provisioning
- Claude Code Architect** — AI-Assisted Development and Prompt Engineering

AWARDS

- Pinnacle Award** — Recognized for continuous learning and performance
- Multi-Dimensional Skill Champion** — Recognized for cross-functional excellence

EDUCATION

Bachelor of Engineering, 2023 — Sathyabama Institute of Science and Technology, India
